Thank you for giving us the opportunity to introduce **New Electric**. Founded in 1970, NE has grown over the years to become a major electrical service and installation contractor serving the industrial markets of North America including: Canton, Michigan, North Carolina, Metropolitan Detroit, Southern Ontario, North Toronto and Cambridge Ontario.

With NE's multiple branches and it's expertise in machine work, we have partnered with the **Shuman Company**. The Shuman Co. started in 1901 in Charlotte, NC in the manufacturing of large sheet feed machines and in 1960, started manufacturing thermoforming machines worldwide. The Shuman thermoforming machines are widely recognized as the long lasting leader in the industry.

NE and Shuman have partnered for the purpose of providing service on your existing equipment. Your needs may include hardware replacement, heater replacement or upgrading, control upgrading, wiring replacement, etc. We can offer a one-time re-work of your equipment or setup a scheduled preventative maintenance that fits with your needs.

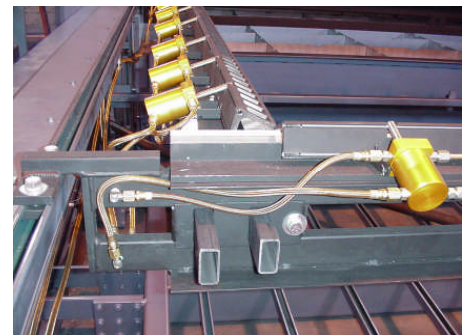

Our service is flexible and can be adapted to meet your needs, and we would be excited in talking with you further on the details.

If you are interested in talking to us more about this service, please don't hesitate to call or email.

Talk to you soon:
